

## **'It's all a bit "wishy-washy": the challenge of building partnerships for effective mental health promotion program evaluation'**

Greer Lamaro

Associate Lecturer

School of Health and Social Development

Deakin University

## **Background**

- > Well established link between mental wellbeing and social connectedness (Glover et al.1998; Berkman and Glass 2000; Kawachi and Berkman 2001; Usciano 2004)
- > Mental wellbeing and social connectedness (MWSC) an emerging health priority (AIHW 2003; DHS 2003; VicHealth 2005)
- > Increasing interventions
- > Limited evaluation literature

## Background (cont'd)

- > Increasing emphasis on evaluation in health promotion (HP)
- > Identified need to enhance HP practitioners evaluation capacity (AIHW 2005; DHS 2003; DHS 2004a)
- > Identified need to enhance outcome measurement in mental health promotion (AHM 2003)
- > Increasing intervention to enhance HP practitioners general evaluation skills (Marshall and Round 2005; Round et al. 2005)

## Aims

- > To explore the current state of evaluation around community based mental wellbeing and social connectedness interventions;
- > To explore the capacity of health promotion practitioners in Primary Care Partnerships to evaluate effectively in this area;
- > To identify barriers and needs for effective evaluation practice.

## Sample

- > Sampling frame/participants
  - > Health promotion practitioners in Primary Care Partnerships (PCP's) in Victoria
  - > Agency managers/line managers
  - > Other key HP peak body stakeholders

## Sample

- > Sampling method
  - > Invitation distributed through PCP network
  - > Purposeful for other key stakeholders
  - > Snowballing

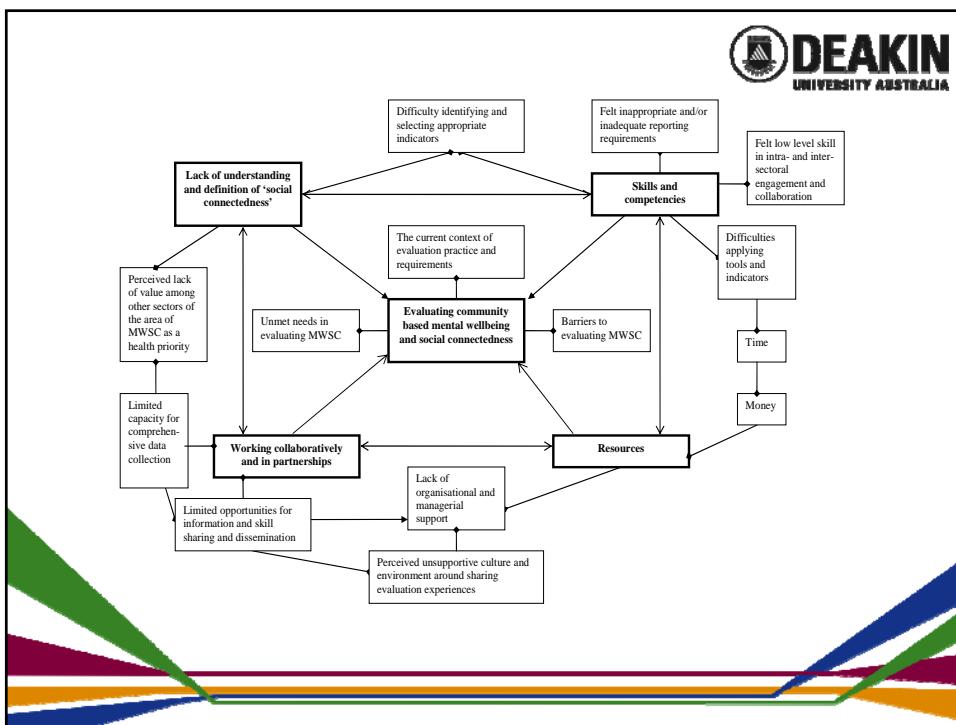

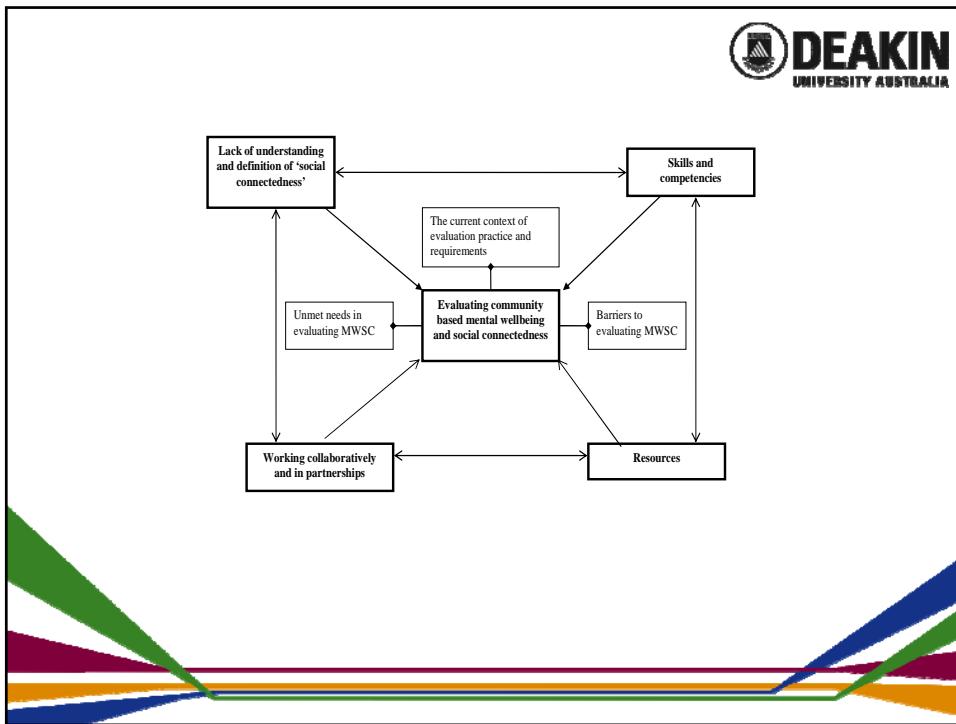

## Methods

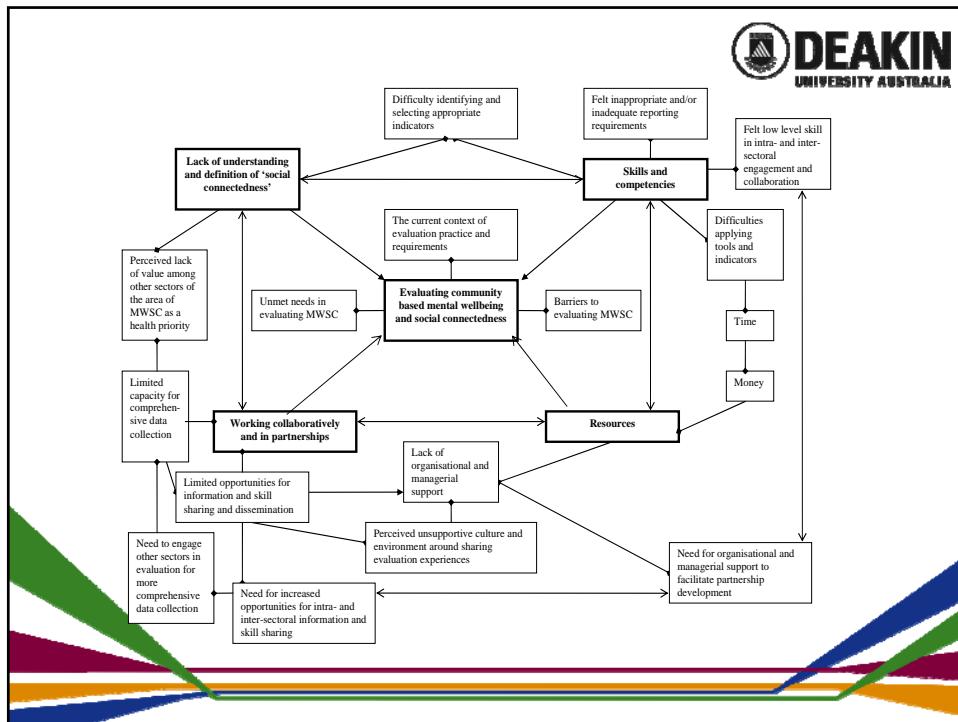

- > Qualitative methods
  - > Literature review and document analysis
    - > Policy documents and PCP community health plans
  - > Semi-structured interviews
  - > Document analysis
    - > PCP and agency evaluation plans, reporting requirements/templates, completed evaluation reports.

## Analysis

- > Extrapolated and grouped according to research question
  - > Inductive coding
    - > Constant comparison
    - > Emergent key themes identified
    - > Triangulation
  - > Concept mapping

## Partnerships

- > Issues of partnerships were central to each of the three key research areas:
  - > Evaluation context
  - > Evaluation capacity
  - > Evaluation needs

## Issues of partnerships in current evaluation context

- > Required for comprehensive data collection
- > Currently low levels of inter- and intra- sectoral partnerships in evaluation
- > Dissatisfaction with current level of support for building partnerships
- > Perception that MWSC is under valued
  - > “perceived as ‘wishy-washy’”

## Partnerships and evaluation capacity

- > Would enhance capacity for undertaking deeper level evaluation
  - > Opportunities for sharing skills, knowledge and experiences
- > Barriers
  - > Intra- and inter- sectoral culture and values
  - > Resources
  - > Skills and confidence

## Partnerships and evaluation needs

- > Specific areas and mechanisms logically derived from issues in current context and capacity
  - > More supportive culture
  - > Greater opportunities for info dissemination and partnership building
  - > Increased managerial support and leadership
  - > Increased capacity building for practitioners to initiate and maintain partnerships

## Partnerships summary

- > For:
  - > Collecting comprehensive, appropriate information
  - > Sharing current evaluation skills and knowledge
  - > Developing evaluation capacity, skills and knowledge
  - > Building dissemination networks
  - > Enhancing best practice

## Summary of challenges in building partnerships

- > Difficulties in initiating and maintaining, both inter-sectorally
  - > Interaction of issues of limited understandings and value of MWSC, resources and skills
  - > Other sector culture and perceptions
    - > "not-valued"
    - > "perceived as 'wishy-washy'"
    - > "don't want to step on other peoples toes" by 'hijacking' programs

## Limitations

- > Small sample size
  - > Limited geographic distribution of PCP's
  - > Limited and selective triangulation

## Conclusion

- > Issues of resources, organisational culture not new
- > Need for partnerships not unique
- > Does highlight complexity of effective evaluation in emerging areas
- > Contributed knowledge to an emerging unit of evidence
- > Timely, given National Mental Health Plan

## Recommendations

- > Agenda for quality and innovation in MH workforce
- > Development of supportive evaluation culture
  - > Provision of resources for evaluation
  - > Leadership
  - > Capacity building opportunities
- > Further research!
  - > Practice based research - Mechanisms of *how* to do this effectively
  - > Studies that extend beyond practitioners and stakeholders in the health sector

## Acknowledgements

- > **Funding:** School of Health and Social Development, Deakin University
- > **Supervision and research guidance:** Mr. Bernie Marshall; Dr. Melissa Graham
- > **Contributors:** Participants from PCP's and peak health bodies who took part in interviews or provided documents for analysis.
