

Front-end Champions in the Evaluation Landscape: 5 Principles for Effective Evaluation Design

Zita M Unger PhD
Anthea Rutter

AES 2016 International Conference
Perth WA
19 September 2016

Overview

1. Front end basics
2. STEM™ Framework
3. 5 Guiding Principles

Front-end

The initial phase of an evaluation, particularly the clarification and design side.

Why we care?

1. Provide measures of success that are meaningful to Stakeholders
2. Capacity building
3. Transparency, accountability and engagement
4. Collect once. Use many times.

Evaluation Stakeholders

Those with a **vested interest** in the evaluand, and in a position to **use the evaluation results** in some way.

Source: Russ-Eft & Preskill, 2009

© 2016 Unger & Rutter

Return

Our proposition:

*Returns are measures of success
that are **meaningful** to Stakeholders*

Source: Unger & Rutter, 1997

© 2016 Unger & Rutter

Evaluation Perspective

Differentiate Strategy from Implementation

Our proposition:

Evaluating programs can be both **tactical and strategic**, deployed as part of strategy (with specific program objectives) and realising strategy (aligned with wider organisational ends).

Evaluating programs can position and elevate units (teams, divisions or agencies) as integral to strategy and an **active** part of driving reform, rather than evaluation's traditional **reactive** role.

Strategic Evaluation Perspective

Beyond program objectives

*“The Strategic and Tactical Evaluation Management (**STEM™**)
is a framework that aligns
evaluation needs with **organisation needs**
in determining the value and contribution of
policy/ programs/ products to “bottom line” success.*

Stakeholder Map 1 of 4

Student Placement Pilot Project								
Stakeholder	Key/Minor Stakeholder	Key/Minor Source	Key/Minor Audience	Contacts	Contacts' details	Interest in SPP	Importance to SPP	Issues/Challenges
PROJECT OWNER								
Peak Body Agency The peak body for the community information & support sector.	Key Stakeholder	Key Source	Key Audience	A, Executive Officer, Peak body agency	[email address]	A (collectively) represents the third largest providers of emergency relief (ER) in Victoria	A is exploring innovative ways to broaden the scope for delivery of ER casework amongst its member agencies.	Sustaining the project into the future
				A has had extensive experience in supervision of students on placement in X member agency	(phone number)	X identifies that the provision of emergency relief needs to go beyond the band-aid approach, and adopt a more wrap-around, client-centred support to vulnerable and disadvantaged people who seek ER.		
						X advocates for the expansion of ER casework beyond the current model		
				Reference Group Member		"Innovative peak body role as the conduit between university student placement and organisational capacity building."		
						"Innovative peak body role in project to develop and support the sector"		
PROJECT FUNDER								
Federal Government Agency The main funder of Emergency Relief casework across Peak Body agencies	Key Stakeholder	-	Key Audience	B, FMP Manager, (Gov Agency) (Victoria Branch)	[email address]	(Gov Agency) is interested in building capacity for agencies to explore innovative ways to deliver ER casework services Funding up to \$20k	(Gov Agency) funding enables many agencies to provide more casework to clients through student placements.	Provide evaluation that indicates student placement enhance agency capacity to meet the needs of complex case clients
				It works very closely with the Peak body Agency and their Executive Officer AA, and is across all issues relating to funding and policies in relation to the FMP (Financial Management Program) of which ER is a subset.	(phone number)	There is increasing recognition in the government sector that client-centric service delivery, particularly those providing medium to long-term support is effective. Innovative programs that build on casework models, in a financially limited funding environment, is of great interest to funding bodies. The SPP addresses workforce and funding issues as well as delivers outcomes to clients.		
				Reference Group Member				
CLIENTS								
ER Clients Community members experiencing financial and personal hardship	Key Stakeholder	-	-			ER clients typically have long term complex problems	Clients are the reason the project came into being. The increase in clients with complex needs require a client-centred approach where long-term client support will alleviate the need for clients to re-present for ER	Continuity of care for clients under this model may be an issue where agencies don't have a paid caseworker on board.

Clarify Stakeholders

Stakeholder Map 2 of 4

	A	B	C	D	E	F	G	H	I
1	Student Placement Pilot Project								
2	Stakeholder	Key/Minor Stakeholder	Key/Minor Source	Key/Minor Audience	Contacts	Contacts' details	Interest in SPP	Importance to SPP	Issues/Challenges
17	UNIVERSITY PARTNERS								
18	1. Tertiary institutions	Key Stakeholder	Key Source	Key Audience	C. Associate Professor, (Department, School, University A)	(email address)	Tertiary institutions, are exploring collaborative partnership opportunities.	(University) (Name of course) course is main source of social work students (3 agencies). (Name of University) social work students are placed in 2 agencies.	Social work educators face a crucial challenge of government policies and funding steering social work placements towards health and clinical placements. This threatens the generic identity of social work, and limits the profession to the provision of specialised services.
19	University A Schools of Social Work				Areas of interest: Teaching practice skills in social work and human services, Women's Services, Supervision in Human Services and Women and Violence		An opportunity to place students in the community sector ensures that tertiary institutions are able to provide flexibility and broad learning environments for students.		
20	University B Schools of Social Work				Reference Group Member		Additionally, there is increasing competition for quality placements.		
21					D. (Position) - Social Work, (Name of School, University B)	(email address)			
22					(works Mon, Tue, Wed & Fri)	(phone number)			
23					Reference Group Member				
24	2. Field Educator	Key Stakeholder	Key Source	Minor Audience	E. (Position) (Peak body Agency) (works Mon & Fri)	(email address)	Independent position) is a qualified social worker, employed by (Agency), to undertake 'professional practice' supervision.	Providing social work supervision and the focus of the external supervisor model. The success of the supervisor model will depend on the supervisor's expertise, knowledge of the sector and capacity to provide a framework to connect theory and practice	Providing structured group and individual supervision that meet the learning needs of students.
25					F. is an experienced social worker, supervisor and educator at TAFE institute. She previously worked in, and supervised students in a Peak body member agency	(Phone number)			Ensuring that students are provided with adequately level of support for effective learning.
26	3. University Liaison	Key Stakeholder	Key Source	Key Audience	G. (Position) (Peak body, School of Global, Urban & Social Studies, (University A)	(Contact Details)	Liaison Persons work with supervisors in providing the support students require whilst on placement.	Provides feedback on the support structures and the student unit model adopted for this placement project	Under this model, students may have up to three levels of support and supervision task supervisor, field educator and liaison person. Coordinating these three levels and ensuring that support meet student needs is a challenge.
27					H. Liaison Person (University B)	(Contact Details)			
28	PLACEMENT AGENCIES								
29	Placement agencies	Key Stakeholder	Key Source	Key Audience	I. (Agency) (Name), (Position)	(Contact Details)	Student placements increase agencies capacity for casework to their ER clients	Very important to the SPP as partners and participants to the project	Sustaining the project beyond the funded period
30	Provide ER to clients				J. (Agency) (Name), Manager	(Contact Details)	Student placements build agencies capacity to enhance existing casework services through project work, or supporting the work of caseworkers.	3 different models of casework where students are placed that can be looked at in greater detail to see how well they worked and how well. The learnings could enable us to prepare or better support casework across a range of different agencies.	
31					K. (Agency) (Name), (Position)	(Contact Details)			
32									

Clarify Stakeholders

Stakeholder Map 3 of 4

Student Placement Pilot Project								
Stakeholder	Key/Minor Stakeholder	Key/Minor Source	Key/Minor Audience	Contacts	Contacts' details	Interest in SPP	Importance to SPP	Issues/Challenges
SERVICE PROVIDERS								
1. Caseworker/ER Service provider/ Task Supervisor	Key Stakeholder	Key Source	Minor Audience	P (Agency) (Name) (Position)		Agencies see clients again and again coming to ER with long term complex problems that need to be worked with a consistent case worker for a period of	Task supervisors provide the support and learning opportunities for students whilst on placement	Task supervision may be burdensome, particularly for supervisors of underperforming students. A challenge is to provide adequate support in a range of forms and formats so that supervisors feel that student placement enhances capacity rather than diminish their capacity to provide client services.
Support clients with complex needs by building relationships, linking and referring clients to relevant services.				Q (Agency) (Name) (Position)		All case workers are task supervisors		
				R (Agency) (Name) (Position)		Dept. allows a portion of ER funding (up to 25%) to pay for a case worker		
				S (Agency) (Name) (Position)				Task supervisors may be new to teaching. A challenge is to encourage task supervisors to develop supervisor skills, support them by creating the mechanisms to build a community of practice.
				T (Agency) (Name) (Position)				
				U (Agency) (Name) (Position)				
				V (Agency) (Name) (Position)				
				W (Agency) (Name) (Position)				
				X (Agency) (Name) (Position)				
				Y (Agency) (Name) (Position)				
2. Volunteers	Minor Stakeholder	-	-			Simple single transaction ER delivery Refer clients to the case worker		
Includes Community Support Workers who interview people needing assistance and provide advocacy services								
3. Students on Placements	Key Stakeholder	Key Source	-	Z (Agency) (Name) (Type)		Students are required to fulfil supervised work placements as part of their social work qualification	Student placement is both a workforce strategy (introducing students to the sector, encouraging students to consider working in the sector after graduation) and capacity building for casework in ER service delivery	Ensuring that students are adequately supported during placement, and that this is both a learning and enjoyable experience
Students engage with agency and provide support and assistance under supervision.				AA (Agency) (Name) (Type)				
				AB (Agency) (Name) (Type)				
				AC (Agency) (Name) (Type)				
				AD (Agency) (Name) (Type)				
				AE (Agency) (Name) (Type)				

Clarify Stakeholders

Stakeholder Map 4 of 4

	A	B	C	D	E	F	G	H	I
1	Student Placement Pilot Project								
2	Stakeholder	Key/Minor Stakeholder	Key/Minor Source	Key/Minor Audience	Contacts	Contacts' details	Interest in SPP	Importance to SPP	Issues/Challenges
57	AGENCIES								
58	1. Existing SW placements	Minor Stakeholder	-	Minor Audience	AG (Agency) (Name), (Position)	These agencies have had ongoing social work student placements for a few years now. By the time funding had been approved for the project, they have already accepted students from other universities.	These agencies have models of student placement in place that could be of great benefit for other agencies to learn from.	Need to demonstrate that a coordinated student placement model increases efficiencies and capacities for agencies that have an existing placement program.	
59	Agencies with social work students on placement (not part of the SPPP)				AK (Agency) (Name), (Position)	Two issues of relevance: these placements do not require external social worker supervision. Because they have established programs and a qualified social worker to provide supervision, and they have long and established relationships with social work departments of other universities including La Trobe, Monash & Monash.	P & H are great supporters of the project, and their experience (organisational as well as personal) in setting up and maintaining a student placement program is beneficial to our membership at large.		
60					AL (Agency) (Name), (Position)	AK's agency has a social work student on placement who has been working as a duty worker at her agency. The student will be working in the agency providing casework in their ER service.			
61					AJ (Agency) (Name), (Position)	Lynette would have liked to join the SPP but because she was going to be away, she decided against it. However, she would be interested in the next lot of placements if we had continued funding for it.			
62	2. Interest in casework model	Minor Stakeholder	-	Minor Audience	AK (Agency) (Name), (Position)	It is very interested in introducing a casework model into her agency, and was hoping to place a masters student to set this up, which will then be continued by rolling social work student placements. It initially placed an Expression of Interest with MNT for a student, but her Committee of Management decided they were not ready, and she had to withdraw her EOI.	Agencies that are looking to expand emergency relief service delivery to include casework are the main reason why CSWIC introduced the project.	Need to demonstrate the viability of social work student placement as an ongoing service delivery model that enhances ER service capacity rather than placing a burden on supervisors.	
63	Agencies with an interest in expanding ER service delivery to include casework model				AL (Agency) (Name), (Position)	A was a little ambivalent about a student placement because supervision will pretty much fall onto her. Being a manager of a largely volunteer organisation (I think that she is the only paid staff) she is very concerned with the amount of time she has to devote to supervising students.	(Agency) recently received philanthropic funding for a part-time caseworker at the agency. If this funding continues and the casework position is a success, it is highly feasible that (Agency) could be a future student placement.	Need to demonstrate that supervision is not necessarily burdensome, and that with the right level of supervisor support (including online blog and external social worker supervisor), the cumulative gain of having a student placement outweighs the time costs.	
64	3. Existing community placements	Minor Stakeholder	-	Minor Audience	AK (Agency) (Name), (Position)	There is a caseworker at Cranbourne providing casework in ER. Student placements at Cranbourne come from the Dandenong/Frankston Chaim (TAFE) to work in their community services section, but not in casework.	A number of member agencies take on students from the local TAFE or other institutions, particularly welfare and community development students. However, they do not have social work student placement due to the requirement for social work supervision under the AASW. (ie. caseworkers across our agencies are qualified in a range of community welfare and psychology professions and don't need to be social workers to perform the role.)	Overcoming the perceived barrier posed by the requirement for social worker supervision (which is being addressed by the external supervision model) and that the external supervision model has both learner/student outcomes and enhances capacity (as opposed to creating a burden).	
65	Agencies with welfare/community studies students on placement (not part of SPPP)				AK (Agency) (Name), (Position)	This agency has established processes for student placement, with a strong relationship with MNT. There have been a change in manager, so it is uncertain where student placements are at.

Guiding Principles

The Five-Way Test

A guide to discretionary use of front-end activities:

1. Will this improve understanding?
2. Will this align with evaluation purpose?
3. Will this assist transparency?
4. Will this build capacity?
5. Will this shape the report?

Comments? Questions?
