How to be a Front-end Champion: 5 principles for building evaluation capital

Zita M Unger PhD Anthea Rutter

AES 2017 International Conference Canberra ACT 5 September 2017

'Evaluation Capital'

Overview

- 1. 5 Guiding Principles
- 2. Front end basics
- 3. STEM™ Strategic Framework
- 4. Examples

5 Principlesfor front-end capacity building

Front-end capacity building

5 Principles

- 1. Clarify Stakeholder Interests
- 2. Whose Outcomes?
- 3. Engage key stakeholders in the evaluation journey
- 4. Build accountability for measurement
- 5. Model the long tail of relevance

Front-end capacity building

5-way test (of the principles)

- 1. Will this improve understanding?
- 2. Will this align with evaluation purpose?
- 3. Will this assist transparency?
- 4. Will this build capacity?
- 5. Will this shape the report?

Front-end basics

Front-end

The initial phase of an evaluation, particularly the clarification and design side.

Evaluation Stakeholders

Those with a **vested interest** in the evaluand, and in a position to **use the evaluation results** in some way.

Source: Russ-Eft & Preskill, 2009

Return

Measures of success that are **meaningful** to Stakeholders

Strategic Model STEM™

The Strategic and Tactical Evaluation Management (**STEM**™) framework

aligns

evaluation needs with organisational needs in determining

contribution and value

of programs

to "bottom line" success.

STEM™ strategic value

- Provide measures of success that are meaningful to Stakeholders
- 2. Capacity building
- 3. Transparency, accountability and engagement
- 4. Collect once. Use many times.

57	AGENCIES	_				<u>-</u>	-	_	-	
_	1. Existing SW placements Anencies with social work challenge or placement (not part of the SPPP	Minor Stakend de		Minor Audience	AG. (Agency): (Name), (Position)			These agencies have had ongoing social work student placements for a few years now. By the time funding had been approved for the project, they have already accepted students from other	These agencies have models of student placement in place that could be of great benefit for other agencies to learn from	Need to demonstrate that a coordinated student placement model increases efficiencies and capacities for agencies that have an existing placement program
58					AH. (Agency): (Name), (Position)			universities. Two issues of relevance: these placements do not require external social worker supervision (because they have established programs and a qualified social worker to provide supervision), and, they have long and established relationship with social work departments of other universities including: La Trobe;	P & H are great supporters of the project, and their experience (organisational as well as personal) in setting up and maintaining a student placement program is beneficial to our membership at large.	
59					Al. (Agency): (Name), (Position)			Melbourne & Monash Ann's agency has a social work student on placement who has been working as a duty worker at her agency. The student will be working in the agency providing casework in their ER service		
61					AJ. (Agency): (Name), (Position)			casework in meir Ex service Lydia would have liked to join the SPP but because she was going to be away, she decided against it. However, she would be interested in the next lot of placements if we had continued funding for it.		
	2. Interest in casework model Agencies with an interest in expanding ER service delivery to include casework model	Minor Stakeholder	-	Minor Audience	AK. (Agency): (Name), (Position)			B is very interested in introducing a casework model into her agency, and was hoping to place a masters student to set this up, which will then be confinued by rolling social work student placements. B initially placed an Expression of Interest with RMIT for a student, but her Committee of Management decided they were not ready, and she had to withdraw her EOI.	Agencies that are looking to expand emergency relief service delivery to include casework are the main reason why CISVic introduced the project.	Need to demonstrate the viability of socia work student placement as an ongoing service delivery model that enhances ER service capacity rather than placing a burden on supervisors.
63					AL. (Agency): (Name), (Position)			A was a little ambivalent about a student placement because supervision will pretty much fall onto her. Being a manager of a largely volunteer organisation (I think that she is the only paid staff) she is very concerned with the amount of time she has to devote to supervising students.	(Agency) recently received philanthropic funding for a part-time caseworker at the agency. If this funding continues and the casework position is a success, it is highly feasible that (Agency) could be a future student placement.	Need to demonstrate that supervision is not necessarily burdensome, and that with the right level of supervisor support (including online blog and external socia worker supervisor), the cumulative gain having a student placment outweighs th time costs.
	3. Existing community placements	Minor Stakeholder	254	Minor Audience	AM. (Agency): (Name), (Position)	_		There is a caseworker at Cranbourne	A number of member agencies take on	Overcoming the perceived barrier posed

Examples

- Refine insights
- Scope creep
- Key questions
- Evaluation plan
- Reporting, check audience

Front-end capacity building 5 Principles

- 1. Clarify Stakeholder Interests
 - → Who are Stakeholders and what kind?
- 2. Whose Outcomes?
 - → How are Stakeholders strategic to **this** evaluation?
- 3. Engage key stakeholders in the evaluation journey
 - → What are stakeholder interests and investment
- 4. Build accountability for measures
 - → Stakeholders justify and confirm their interest and return
- 5. Model the long tail of relevance
 - → Build evaluation capacity at every opportunity!

Final thoughts

We hope you understood...

- The different types of stakeholders and how they relate to an evaluation process
- The importance of moving stakeholder interests into measurable outcomes
- The importance of stakeholder engagement in contributing to the design of an evaluation and use of evaluation results
- That our STEMTM model is a strategic process which helps build credibility and accountability at each level.

Final thoughts

Why we care ...

- Provide measures of success that are meaningful to Stakeholders
- Enable transparency, accountability and engagement
- Collect once. Use many times builds capacity
